

Information Technology Career Field

Object Oriented Programming

Subject Code: 145065

Outcome & Competency Descriptions

Course Description:

Students will learn to represent programming concepts as "objects" that have data fields and associated procedures known as methods. Students will implement classes such as support static, instance method, inheritance, polymorphism, exception handling, and object serialization. A variety of commercial and open source programs and applications will be used.

Strand 2. IT Fundamentals

Learners apply fundamental principles of IT, including the history of IT and its impact on society, common industry terms, systems theory, information storage and retrieval, database management, and computer hardware, software, and peripheral device configuration and installation. This base of knowledge and skills may be applied across the career field.

Outcome 2.3. Data Encoding

Explain and describe data encoding basics.

Competencies

- 2.3.1. Identify and explain coding information and representation of characters (e.g., American Standard Code for Information Interchange [ASCII], Extended Binary Coded Decimal Interchange Code [EBCDIC], Unicode).
- 2.3.2. Convert between numbering systems (e.g., binary, hexadecimal, decimal).

Outcome 2.4. Emerging Technologies

Identify trending technologies, their fundamental architecture, and their value in the marketplace.

Competencies

- 2.4.1. Investigate the scope and the impact of mobile computing environments on society.
- 2.4.2. Describe the differences, advantages, and limitations of cloud computing (e.g., public cloud, private cloud, hybrid cloud) and on premises computing.
- 2.4.3. Utilize cloud computing applications (e.g., services, applications, virtual environments).

Outcome: 2.9. Project Concept Proposal

Develop a project concept proposal.

Competencies

- 2.9.1. Identify and incorporate branding strategies.
- 2.9.2. Determine the scope and purpose of the project.
- 2.9.3. Determine the target audience, client needs, expected outcomes, objectives, and budget.
- 2.9.4. Develop a conceptual model and design brief for the project.
- 2.9.5. Develop a timeline, a communication plan, a task breakdown, costs (e.g., equipment, labor), deliverables, and responsibilities for completion.
- 2.9.6. Develop and present a comprehensive proposal to stakeholders.

Information Technology Career Field
Object Oriented Programming
Subject Code: 145065
Outcome & Competency Descriptions

Outcome: 2.10. Equipment

Select, operate, and maintain equipment.

Competencies

2.10.2. Identify processor, memory, storage, power and environmental requirements.

Outcome: 2.11. Troubleshooting

Select and apply troubleshooting methodologies for problem solving.

Competencies

2.11.1. Identify the problem.

2.11.2. Select troubleshooting methodology (e.g., top down, bottom up, follow the path, spot the differences).

2.11.3. Investigate symptoms based on the selected methodology.

2.11.4. Gather and analyze data about the problem.

2.11.5. Design a solution.

2.11.6. Test a solution.

2.11.7. Implement a solution.

2.11.8. Document the problem and the verified solution.

Outcome: 2.12. Performance Tests and Acceptance Plans

Develop performance tests and acceptance plans.

Competencies

2.12.1. Create a written procedure agreed by the stakeholders and project team for determining the acceptability of the project deliverables.

2.12.2. Develop a test system that accurately mimics external interfaces.

2.12.3. Develop test cases that are realistic, compare with expected performance, and include targeted platforms and device types.

2.12.4. Develop, perform, and document usability and testing integration.

2.12.5. Make corrections indicated by test results.

2.12.6. Seek stakeholder acceptance upon successful completion of the test plan.

Outcome: 2.13. Rollout and Handoff

Plan rollout and facilitate handoff to customer.

Competencies

2.13.1. Include overall project goals and timelines in the rollout plan.

2.13.2. Communicate rollout plans to key stakeholders in a timely manner.

2.13.3. Conduct final review and approvals according to company standards.

2.13.4. Identify support staff, training needs, and contingency plans in the rollout plan.

2.13.5. Test delivered application to assure that it is fully functional for the customer or user and meets all requirements.

2.13.6. Deliver support and training materials.

Information Technology Career Field
Object Oriented Programming
Subject Code: 145065
Outcome & Competency Descriptions

Strand 3. Information Security

Learners apply principles of information security to implement and maintain security compliance and network security. Learners select components and mechanisms required for a multilayer defense structure and evaluate and minimize security risks to wired and wireless networks and devices.

Outcome: 3.2. General Security Compliance

Implement and maintain general security compliance.

Competencies

- 3.2.1. Identify and implement data and application security
- 3.2.8. Identify the need for disaster recovery policies and procedures.

Information Technology Career Field
Object Oriented Programming
Subject Code: 145065
Outcome & Competency Descriptions

Strand 5. Infrastructure Systems

Learners apply principles of networking and infrastructure related to the installation, administration, and maintenance of computer networks and components. Knowledge and skills may be applied to network connectivity, cabling, protocols, architecture, classification, topologies, operating systems, Open Systems Interconnection (OSI) standards, data encoding, Quality of Service (QoS), Internet Protocol (IP) addressing, and wide area network (WAN) design.

Outcome: 5.1. Programming Concepts

Describe programming concepts.

Competencies

- 5.1.1. Describe how computer programs and scripts can be used to solve problems (e.g., desktop, mobile, enterprise).
- 5.1.2. Explain how algorithms and data structures are used in information processing.
- 5.1.3. Model the solution using both graphic tools (e.g., flowcharts) and pseudocode techniques.
- 5.1.4. Describe, compare, and contrast the basics of procedural, structured, object-oriented (OO), and event driven programming.
- 5.1.5. Describe the concepts of data management through programming languages.
- 5.1.6. Analyze the strengths and weaknesses of different languages for solving a specific problem.
- 5.1.7. Compare the functions and operations of compilers and interpreters.
- 5.1.8. Describe version control and the relevance of documentation.

Outcome: 5.2. Computational and String Operations

Develop code that performs computational and string operations.

Competencies

- 5.2.1. Compare primitive types of numeric and nonnumeric data (e.g., integers, floats, Boolean, strings).
- 5.2.2. Identify the scope of data (e.g., global versus local, variables, constants, arrays).
- 5.2.3. Write code that uses arithmetic operations.
- 5.2.4. Write code that uses subtotals and final totals.
- 5.2.5. Write code that applies string operations (e.g., concatenation, pattern matching, substring).

Outcome: 5.3. Logical Operations and Control Structures

Develop code that uses logical operations and control structures.

Competencies

- 5.3.1. Explain Boolean logic.
- 5.3.2. Solve a truth table.
- 5.3.3. Write code that uses logical operators (e.g., and, or, not).
- 5.3.4. Write code that uses relational operators and compound conditions.
- 5.3.5. Write code that uses conditional control structures (e.g., if, if-then-else).
- 5.3.6. Write code that uses repetition control structures (e.g., while, for).

Information Technology Career Field
Object Oriented Programming
Subject Code: 145065
Outcome & Competency Descriptions

- 5.3.7. Write code that uses selection control structures (e.g., case, switch).
- 5.3.8. Write code that uses nested structures and recursion.
- 5.3.9. Write code that creates and calls functions.
- 5.3.10. Code error handling techniques.
- 5.3.11. Write code to access data repositories.
- 5.3.12. Write code to create classes, objects, and methods.

Outcome: 5.4. Integrated Development Environment

Build and test a program using an integrated development environment (IDE).

Competencies

- 5.4.1. Configure options, preferences, and tools.
- 5.4.2. Write and edit code in the integrated development environment (IDE).
- 5.4.3. Compile or interpret a working program.
- 5.4.4. Define test cases.
- 5.4.5. Test the program using defined test cases.
- 5.4.6. Correct syntax and runtime errors.
- 5.4.7. Debug logic errors.

Outcome: 5.5. Programming Conventions

Develop programs using applications security practices.

Competencies

- 5.5.1. Develop programs using data validation techniques.
- 5.5.2. Develop programs that use reuse libraries.
- 5.5.3. Develop programs using operating system calls.
- 5.5.4. Develop programs that call other programs.
- 5.5.5. Use appropriate naming conventions and apply comments.
- 5.5.6. Format output (e.g., desktop, mobile, enterprise, reports, data files).

Outcome: 5.6. Software Development Lifecycle

Apply the software development lifecycle (SDLC).

Competencies

- 5.6.1. Determine requirements specification documentation.
- 5.6.2. Identify constraints and system processing requirements.
- 5.6.3. Develop and adhere to timelines.
- 5.6.4. Identify a programming language, framework, and an integrated development environment (IDE).
- 5.6.5. Identify input and output (I/O) requirements.
- 5.6.6. Design system inputs, outputs, and processes.
- 5.6.7. Document a design using the appropriate tools (e.g., program flowchart, dataflow diagrams, Unified Modeling Language [UML]).
- 5.6.8. Create documentation (e.g., implementation plan, contingency plan, data dictionary, user help).
- 5.6.9. Review the design (e.g., peer walkthrough).

Information Technology Career Field
Object Oriented Programming
Subject Code: 145065
Outcome & Competency Descriptions

- 5.6.10. Present the system design to stakeholders.
- 5.6.11. Develop the application.
- 5.6.12. Compare software methodologies (e.g., agile, waterfall).
- 5.6.13. Perform code reviews (e.g., peer walkthrough, static analysis).
- 5.6.14. Ensure code quality by testing and debugging the application (e.g., system testing, user acceptance testing).
- 5.6.15. Train stakeholders.
- 5.6.16. Deploy the application.
- 5.6.17. Collect application feedback and maintain the application.

Outcome: 5.7. Configuration/Change Management

Describe configuration management activities.

Competencies

- 5.7.1. Explain version management and interface control.
- 5.7.2. Explain baseline and software lifecycle phases.
- 5.7.3. Analyze the impact of changes.
